

A photograph of a modern bathroom sink. The sink is white, rectangular with rounded corners, and sits on a dark countertop. Behind the sink is a chrome faucet with two handles. In the background, there are white marble tiles and a peace lily plant in a black pot. The lighting is bright, creating reflections on the sink and tiles.

ASHER

SANITARY WARES
PRODUCT CATALOG

COMPANY PROFILE

Hup Seng established since 1995 year with a belief that quality is a way of life that everyone deserves.

The company, with the support and network within the group, provides quality and affordable sanitary ware for residential, institutional and commercial premises. We understand the essence of interior architecture is to recognize the need to make our place a better one.

ASHER is the registered trade mark brand for our sanitary wares and we are committed to provide you the much needed lifestyle by delivering distinctive services as we work with architects, interior designer, engineers, property developers, contractors and relevant authorities. Water conservation is our's business and our water closet are made to be water saver. In addition, our products conform to Malaysia Standard MS147:2001, MS1522:2001, MS 2574:2014.

We has been creating a niche market for quality products at affordable prices. With advance equipment, upgraded skill workforce and quality parameters adhering to internationally acceptable norms has made us as one of the most desirable and fastest growing brands in the country and oversea.

Together with our well structure management team, continues to strive in pursuit of excellence to provide and maintain competitive products to our valued customers.

PRODUCTION PROCESS

MOULD DESIGN

From the design, we have our in-house mould making department. Trained professional mould maker could for new design, OEM for our client.

PRODUCTION

Battery cast & preasure casting are used in our production line in order to achieve smooth green ware.

CASTING

Well trained casting to handling of green ware, ensure only perfect green ware are sent to next production step.

FIRING

Our ware are fired at 1250°C to ensure the finished products are at least water absorption and safer to used.
